Office Address: 27 Waseda-machi, Shinjuku-ku, Tokyo, Japan

Office Phone: (+81) 3-3203-4468

E-mail: higuchi [at] pcl.cs.waseda.ac.jp

EDUCATION

- **Ph.D. in Computer Science and Engineering** Apr. 2021 – Mar. 2024
Department of Computer Science and Communications Engineering, Waseda University, Japan
 - Supervisor: Tetsunori Kobayashi, Tetsuji Ogawa
 - Thesis title: “Incorporating Linguistic Cues for End-to-End Speech Recognition”
- **M.E. in Computer Science and Engineering** Apr. 2019 – Mar. 2021
Department of Computer Science and Communications Engineering, Waseda University, Japan
 - Supervisor: Tetsunori Kobayashi, Tetsuji Ogawa
 - Thesis title: “Non-Autoregressive End-to-End Speech Recognition with CTC and Mask-predict”
- **B.E. in Computer Science and Engineering** Apr. 2015 – Mar. 2019
Department of Computer Science and Engineering, Waseda University, Japan
 - And with a minor in Intermedia Art and Science
 - Supervisor: Tetsunori Kobayashi, Tetsuji Ogawa
 - Thesis title: “Speaker Invariant Feature Extraction for Zero-Resource Languages”

EXPERIENCE

- **Google LLC** Oct. 2022 – Jan. 2023
Research Intern New York, USA
 - Mentor: Andrew Rosenberg, Bhuvana Ramabhadran
 - Worked on text injection in speech recognition
 - Major publication(s): [Higuchi+, ASRU’23]
- **Carnegie Mellon University** Mar. 2022 – June 2022
Visiting Scholar Pennsylvania, USA
 - Mentor: Shinji Watanabe
 - Worked on language modeling in speech recognition
 - Major publication(s): [Higuchi+, EMNLP Findings’22] [Higuchi+, ICASSP’23b]
- **Mitsubishi Electric Research Laboratories** Oct. 2020 – Mar. 2021, Apr. 2021 – Dec. 2021
Remote Research Intern, Part-Time Researcher Massachusetts, USA
 - Mentor: Takaaki Hori, Niko Moritz, Jonathan Le Roux
 - Worked on semi-supervised speech recognition
 - Major publication(s): [Higuchi+, Interspeech’21] [Higuchi+, JSTSP’22]
- **Johns Hopkins University** Dec. 2019 – Mar. 2020
Visiting Scholar Maryland, USA
 - Mentor: Shinji Watanabe
 - Worked on non-autoregressive speech recognition
 - Major publication(s): [Higuchi+, Interspeech’20] [Higuchi+, ICASSP’21]
- **IBM Research AI** June 2019 – Oct. 2019
Research Intern Tokyo, Japan
 - Mentor: Masayuki Suzuki, Gakuto Kurata
 - Worked on speaker embeddings for speaker diarization
 - Major publication(s): [Higuchi+, ICASSP’20]
- **NTT Communication Science Laboratories** Aug. 2018 – Sept. 2018
Research Intern Kagawa, Japan
 - Mentor: Hirokazu Kameoka
 - Worked on voice conversion based on generative adversarial networks

EXTERNAL RESEARCH FUNDING

- **Super Global University (Visit to Carnegie Mellon University) | 1,000,000 JPY** *Mar. 2022 – June 2022*
from Top Global University Japan Project
 - In this study abroad program, I have participated in joint research with Prof. Shinji Watanabe at the Language Technologies Institute, Carnegie Mellon University. The primary goal of our project was to explore the integration of a pre-trained language model into end-to-end speech recognition.
 - Major publication(s): [Higuchi+, EMNLP Finding'22] [Higuchi+, ICASSP'23a] [Yan+, EACL'23]
- **ACT-X Frontier of Mathematics and Information Science | 4,500,000 JPY** *Oct. 2021 – Mar. 2024*
from Japan Science and Technology Agency (JST)
 - This research project aimed to improve the recognition accuracy and functionality of end-to-end speech recognition models, focusing on the development of technology for effectively extracting linguistic information from speech information. In particular, by explicitly designing a feature extraction process that incorporates linguistic knowledge, I have established a novel framework for end-to-end speech recognition that does not solely rely on data-driven approaches. Moreover, the proposed framework has been shown useful for tasks that require semantic understanding in conjunction with speech recognition.
 - Major publication(s): [Higuchi+, ICASSP'22b] [Higuchi+, ICASSP'23b] [Higuchi+, arXiv'23]
- **Research Fellowship for Young Scientists (DC1) | 2,200,000 JPY** *Apr. 2021 – Mar. 2024*
from Japan Society for the Promotion of Science (JSPS)
 - To enhance the practicality of speech-based communication interfaces, this research project aimed to develop a speech recognition system that operates with high accuracy and fast speed. To this end, I have constructed a non-autoregressive end-to-end speech recognition system based on masked language models. Compared to conventional autoregressive systems, the proposed model has been shown to achieve significant improvements in inference speed while maintaining a similar level of recognition accuracy.
 - Major publication(s): [Higuchi+, ICASSP'21] [Higuchi+, ASRU'21] [Zhao+, EUSIPCO'23]
- **Super Global University (Visit to Johns Hopkins University) | 1,000,000 JPY** *Dec. 2019 – Mar. 2020*
from Top Global University Japan Project
 - In this study abroad program, I have participated in joint research with Prof. Shinji Watanabe at the Center for Language and Speech Processing, Johns Hopkins University. The primary goal of our project was to explore an end-to-end speech recognition model architecture that can operate with fast inference speed.
 - Major publication(s): [Higuchi+, Interspeech'20] [Guo+, ICASSP'21] [Watanabe+, DSLW'21]

AWARDS

- **Best Reviewer Award** *Dec. 2023*
from IEEE Automatic Speech Recognition and Understanding Workshop (ASRU)
- **ISS Young Researcher's Award in Speech Field** *Sept. 2021*
from the Institute of Electronics, Information and Communication Engineers (IEICE)
- **Repayment Exemption for Graduate Students with Excellent Achievements (full-exemption)** *Mar. 2021*
from Japan Student Services Organization (JASSO)
- **Best Student Presentation Award** *Nov. 2020*
from the Acoustical Society of Japan (ASJ)
- **Yamashita SIG Research Award** *Aug. 2020*
from Information Processing Society of Japan (IPSJ)
- **Yahoo! JAPAN Award** *Jan. 2020*
from Information Processing Society of Japan (IPSJ) SIG-SLP

REVIEWING ACTIVITY

ACL: 2024 APSIPA: 2020, 2021 ASRU: 2023 ICASSP: 2023 Interspeech: 2023, 2024 SLT: 2022
SPECOM: 2024 TASLP: 2022, 2023, 2024

SKILLS

- **Language:** Japanese (native), English (fluent)
- **Programming:** Python, C, C++, Java, JavaScript, LaTeX
- **Software & Tools:** PyTorch, Chainer, TensorFlow, ESPnet, Kaldi, Lingvo
